PRESS RELEASE

National Specialty Underwriters, Inc. (NSU) announced today that they have entered into an exclusive agreement with Tudor Insurance Company to act as the program administrator for SELECTIMAGING, a new insurance program targeting malpractice coverage for Diagnostic Imaging Centers.

NSU's Healthcare division, a specialist in the wholesale of medical professional liability, will offer SELECTIMAGING to independent agents and brokers nationwide. The program provides Medical Professional and General Liability coverage for freestanding, non-hospital based diagnostic imaging centers, engaged in any of the following processes: MRI, X-Ray, Ultrasound, Mammography, CT Scanner, Nuclear Medicine, Vascular, PET Scan.

By focusing on this niche market, NSU will be able to offer the Imaging community a stable, competitively priced insurance product with a variety of choices when it comes to deductible and limits. Coverages options will include Sexual Molestation and/or Abuse, Employee Benefit Liability, TRIA (Terrorism Risk Insurance Act of 2002), and Non-Owned Auto Liability. A very attractive minimum earned premium requirement applies.

Leslie Miller, Sr. Vice President in charge of NSU Healthcare is particularly pleased with the agreement. "The Group's financial strength and stability are recognized by the insurance industry," says Miller. "A.M. Best has awarded Western World Insurance Group a rating of A+ (Superior) and the Group has been listed among the Ward's Top 50 insurance companies for the past ten years. Like NSU, they specialize in Medical Professional and can be counted on to understand the risks and needs of the healthcare industry. And NSU will have authority to underwrite and bind risks, so we can be extremely responsive to our customers needs."

More information on SELECTIMAGING and other products can be obtained by contacting NSU at 425-450-1090 or visiting their website at www.nsui.com <<http://www.nsui.com>>.
